Experience

Software/UI Intern

Jul 2025 – Oct 2025

Ant AI

- Contributed to an AI-driven meeting assistant that converts transcripts into structured outputs (SRS, Figma specs, sprint tasks), improving team productivity.
- Led frontend and UI enhancements to **improve usability** and overall **user experience**.

Software Consulting Intern - JFC

Jun 2025 – Jul 2025

Digital Village

- Built a production-ready full-stack site that automates form filling using **AI**, leveraging **TypeScript**, **Tailwind**, and **RESTful** architecture.
- Migrated prototype to a scalable version using **AWS & Docker**.

Casual Academic – Data Structures & Algorithms

Feb 2025 – Jun 2025

University of Sydney

- Tutored 40+ students in introducing **Data Structures and Algorithms** in **Python**, providing guidance during labs and assessments.

Projects

Portfolio Website

Jan 2026 – Feb 2026

vanisha.vercel.app

Personal

- Designed & developed an animated & responsive portfolio **React** with **Typescript**, **HTML** & **CSS** to showcase projects & skills.

CarbonWise: Sustainable Marketplace

Aug 2025 – Nov 2025

ELEC5619

University project

- Created a platform to allow users to sell/exchange their used goods with features to browse & filter products, message & rate sellers, and create listings.
- Developed a full-stack marketplace following **UX** and **security** principles using **Springboot**, **React**, **Java**, **JavaScript**, **HTML** & **CSS** and **MySQL**

Support Generators for 3D Printers

Aug 2024 – Nov 2024

ASIGA

Capstone Project

- Coded a tool to detect overhangs in mesh models for 3D printing using **Python**, **vedo**, and **pyVista** for company ASIGA.
- Generated adaptive support structures using visualization libraries, significantly reducing material usage.

Skills

Languages: Python (Advanced), Java, TypeScript, JavaScript, SQL, C, C++, R

Frameworks: React, Next.js, Spring Boot, Flask, Django

Cloud & DevOps: AWS, Docker, Jenkins

Databases: PostgreSQL, MySQL, Firebase
