Education

University of Sydney

Aug 2022 – June 2026 (Expected)

Bachelor of Engineering (Software Engineering) (Honours)

- WAM: 78/100
- **Sydney Scholars Award** recipient (\$160,000 stipend + 20% tuition fee waiver) awarded for academic excellence.

Experience

Software/UI Intern

Jul 2025 – Oct 2025

Ant AI

- Built backend/audio features using **Python** for an AI meeting assistant converting transcripts into software requirement specifications, Figma designs, & sprint tasks, accelerating internal product workflows.
- Conducted user interviews and surveys to identify navigation bottlenecks, then designed & implemented interface improvements in **HTML** and **CSS**, resulting in **faster navigation** and reduced onboarding time for pilot users by ~5 minutes.

Software Consulting Intern - JFC

Jun 2025 – Jul 2025

Digital Village

- Built a production-ready full-stack site automating form filling using **AI**, leveraging **TypeScript**, **Tailwind**, and **RESTful** architecture, reducing average completion time by ~60%.
- Migrated prototype to a scalable version using **AWS (EC2, S3)** with **Docker-based containerization**.

Casual Academic – Data Structures & Algorithms

Feb 2025 – Jun 2025

University of Sydney

- Tutored 50+ students in **Data Structures and Algorithms** in **Python**, providing guidance during labs and assessments to help them gain an in-depth understanding of recursion, trees, graphs, search algorithms & time complexity.

Projects

OnTheCharts: a Real-Time Spotify Analytics Platform

Aug 2025 – Nov 2025

ELEC3609

- Designed and deployed a real-time analytics platform with **Python**, **Vite**, **AWS**, integrating the Spotify Web API to support 20+ **concurrent user sessions** through **asynchronous request handling** and **live data refresh**.
- Implemented **session-level caching** to reduce response latency and mitigate external API rate limits, and **hardened backend security** via input validation, CSRF protection, and XSS mitigation.

CarbonWise: a Sustainable Marketplace Platform

Aug 2025 – Nov 2025

ELEC5619

- Designed and implemented a full-stack marketplace with authenticated users, product listings, real-time messaging, and seller ratings, built with **Java**, **Spring Boot**, **React**, **JavaScript**, **HTML & CSS**, and **MySQL**.

Support Generators for 3D Printers

Aug 2024 – Nov 2024

ASIGA

- Designed a tool for ASIGA to detect & visualise overhangs in mesh models for 3D printing using **Python**.
- Generated adaptive support structures using visualization libraries, reducing material usage by ~35% across test models.

Leadership

Events Director – Google Developers Group Sydney:

- Organised and presented at 10+ Google-backed tech events, leading speaker outreach and increasing total attendees by 20%.

HR Director – Network of Women:

- Managed & improved recruitment and onboarding systems for a 1500+ member organisation and coordinated internal communication & large-scale networking events.

Skills

Languages: Python, Java, TypeScript, JavaScript, SQL, R, C

Frameworks & Technologies: React, Next.js, Spring Boot, Flask, Django, HTML, CSS, RESTful APIs, PostgreSQL, MySQL, Firebase

Cloud & DevOps: AWS, Docker, Jenkins

Tools: Git, Linux, Wireshark, Gradle, Jira, Bitbucket, Vercel, Figma
